

Color Our World™

Mad Science has been educating and entertaining children for almost 35 years. Our programs are designed to **bring STEM topics to life** and to instill a love of learning in children. With our expertise, we can help you add the **wow factor** to your library reading program this summer.

Lights, Color, Action!

WORKSHOP 1 hour | \$320

Discover Newton's color theory concepts with spectrum-splitting prisms, use spectrosopes, ultraviolet light and witness the wonders of chromatography!

KEY FEATURES

- Explore how light and color diffraction works
- Use scientific tools to discover light spectrums

Brixology Machines

WORKSHOP 1 hour | \$310

Learn how gears, levers, and pulleys are useful tools then combine them with art and design to create a motorized drawing machine.

KEY FEATURES

- Integration of engineering and arts
- Utilization of fine motor skills

Spin, Pop, Boom!

SHOW 1 hour | \$675

Our Mad Scientist will spin up some stretchy polymers, pop off facts about air, and finish off with an electrifying boom!

KEY FEATURES

- Learn about and experience chemical changes
- Audience participation in the science fun
